

THE FIRST 36 ONBOARDING MANAGEMENT SYSTEM

Maximize employee performance and opportunity by utilizing our new First 36 onboarding management system which empowers users to register for instructor-led events, on-line courses, Webinars as well as on-line resources. Solo Learning's software system allows users anytime, anywhere access to standard and custom course offerings and resources within a pre-assigned learning path. This system focuses on user learning events specifically related to their job function/job title. Manage, plan and deliver all learning events within your organization from one source. First 36 includes the following features:

- Integration with third-party applications like DimDim and WebEx.
- Interactive and highly-personalized Web experiences that work across all of the most popular browsers.
- Web protocol support for clients to build custom applications and portals.
- Quick reporting on the most commonly run reports.
- Ability for the administrators to generate custom reports via the report generator.
- Customizable student Web portal that allows for adding and modifying of functionality.
- Organization can be dynamically configured to handle any organizational structure.
- Manageable threaded messaging board services.
- Create tests, quizzes, and assessments.
- Unlimited custom fields for students.
- Rapid deployment for project or company wide purposes.
- Multi-language packages are available.
- Available in the Software-as-a-Service (SAAS) model, reducing IT overhead.
- Automated e-mail engine minimizes administration tasks.
- Scalable options from 25 to 25,000+ students.
